 To gain employment in an organization wherein I get maximum opportunity to utilize and enhance my skills and learn new technologies. To develop myself and become a successful engineer with ability to look after complex engineering problems and provide reliable solutions.

TECHNICAL SKILLS

Programming Languages : Core Java, C++ , C , JavaScript
Frameworks : Spring Boot, Spring MVC, JDBC, Hibernate, ExpressJS, ASP.NET
Web Technologies : ReactJS, HTML, CSS, Bootstrap

Database : MySQL

PROJECTS

OneStop Service

- In today's fast-paced world, individuals often face challenges to discover reliable service providers, navigate through different interfaces for home and personal services and ensure secure transactions.
- The One-Stop Services Platform addresses these challenges by providing a comprehensive and centralized solution. It offers three key roles: Admin, Customer, and Vendor. Customers benefit from browsing, comparing service costs, and providing feedback. They can raise service requests, facilitating efficient communication with vendors.
- Administrators approve vendors and can disable accounts based on customer feedback. The platform enables secure and streamlined transactions, making it easier for service providers to reach their target audience and manage information effectively. Customers can track all received services for future reference, streamlining the traditional service-seeking process.

WORK EXPERIENCE

Internship

Biopipe Global corp.   *Dec 2020 - March 2021*
